

# Easy Fill

With continued focus on product integrity, our easy fill machine effectively reduces kernel breakage by lifting the bin to product infeed height and progressively lowering as the bin gets full.

## EQUIPMENT SPECIFICATIONS

- Hydraulic Power Unit: Variable flow electric pump with oil reservoir
- Max. Pressure: 3000 PSI
- Electric motor Max Power: 2.2 kW (3 HP)
- Supply voltage: 230 / 460 V – AC, 3 Phase, 60 Hz
- Max. Load (included bin): 2000 lb
- Max. / Min. bin maneuvering angle: 90° (all models) / -3° (depends on the model)

## FEATURES

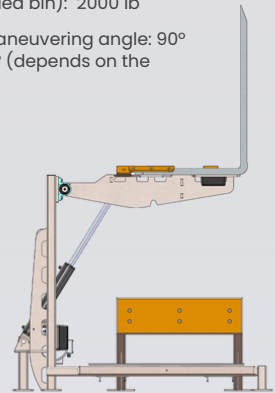

Single Hydraulic cylinder operated bin rotation

Electronically controlled bin rotation by steps

Main frame material: Stainless steel

Safety Panels

It can operate with metallic, wooden and plastic bins

## OPTIONS

- ✓ Bin feeding systems: roller conveyor, forklift
- ✓ Floor Scale to weigh product in the bin
